

Naveen Kumar Uppuluri

LAMP Full Stack Developer

Phone: 510-936-1299

Website: www.cyberlace.com

E-mail: unk1989@outlook.com

Professional Summary:

- **7+ years** of **IT experience** in all phases of **Software Development Life Cycle (SDLC)** such as Requirement Gathering, Planning, Analysis, Design, Implementation, Testing and Maintenance in domains like **Finance, Learning Management System(LMS), Content Management System(CMS)**, etc.,
- Intensive work on rich user interface development using **HTML5, CSS3, JavaScript, JQuery, AngularJS, XML and JSON** upon various server-side technologies like **PHP**.
- Experienced in a fast-paced **Agile Development** Environment including **Test-Driven Development (TDD)** and **Scrum**.
- Experienced in **PHP Full Stack** Development in a **LAMP** environment, building **highly scalable web apps** and providing **optimized solutions** for web applications
- Proficient in **PHP Design Patterns** like **Model View Controller (MVC)**, etc.,
- Strong in **Object Oriented Analysis and Design (OOAD)**, **ERD documentation**, **UML artifacts modeling**.
- Very Strong in **Object-oriented programming (OOP)** concepts.
- Integration of payment gateways like **PayPal, EBS, CCAvenue**, etc.,
- Good working knowledge of **Amazon Web Services** like **EC2, S3, RDS**, etc.,
- Experience in using **Vagrant** and **Docker** for local development
- Extensive experience in developing **PHP based Web Services** to expose useful functionality to web users through **SOAP / REST** describing them using **WSDL**.
- **Implementation of components** and **wire-frames** using cross-browser compatible **CSS, JavaScript, AngularJs, JQuery and AJAX**.
- Made use of **AngularJS** concepts like **Scopes, Models, Services, Dependency Injection**, and **Routing**.
- Skills in optimizing **Responsive Web design** using **CSS media queries** and **Twitter bootstrap**.
- Experience in database related work at **Optimizing the MySQL Queries**, primarily creating **complex stored procedures, Views, Triggers, Functions**, using **MySQL**.
- Developed **custom plugins** in **WordPress** and customized existing plugins by creating add-on plugins.
- Hands on Experience in Parsing the XML, HTML DOM using **XPath** expressions/queries.
- Basic Knowledge in **Shell Scripting**.
- Worked on IDE's such as **Notepad++, Eclipse, Aptana Studio, Adobe Dreamweaver CS 5.5, Net Beans, JetBrains PhpStorm** for developing, deploying and debugging the applications.
- Excellent **Written, Analytical Skills, Verbal Communication** skills with a customer service oriented attitude and **worked with the offshore team** as onsite coordinator to provide the update on the daily basis.
- Good Knowledge of using **Adobe Photoshop** for designing.

Skill Set

Operating System	:	Windows and Linux
Web Technologies	:	HTML5, CSS3, JavaScript, AngularJs, JQuery, AJAX, JSON, XML, YAML
Scripting	:	PHP, Shell Scripting, XPath
Database	:	MySQL
Frameworks	:	Yii Framework, Zend Framework, Symfony Framework
IDE & Tools	:	Notepad++, Eclipse, Aptana Studio, PhpStorm, Dreamweaver, Photoshop
Debugging Tools	:	Firebug, Chrome Developers Tool
Version Controls	:	SVN, GIT
CMS	:	Wordpress

Education Details

- B. Tech in CSE from Jawaharlal Nehru Technological University, Kakinada, AP, India
- M.S in C.S from Northwestern Polytechnic University, Fremont, CA, USA

Professional Experience

Client: McGraw Hill Education / TCS

October 16 – Present

Employer: IT Quaterbacks LLC

Role: Project Lead

Project Title: Engrade / connect-2

URL: <https://engradepro.com> / <https://connect2.mheducation.com>

Description:

Engrade is a configurable, module-based product that offers a variety of settings and features for schools and school districts.

Responsibilities:

- Involved in Agile project planning, backlog grooming and daily scrums.
- Mentored and assisted other team members as tech lead.
- Review other team members code and approve their pull requests.
- Used Vagrant / Docker for local development.
- Created unit tests using PHPUnit.
- Implemented new pages on basis of PSD mockups.
- Modified the existing pages as per AA level WCAG 2.0 accessibility guidelines.
- Optimize the pages and queries so that the web pages load faster.
- Used GIT for Code Management.

Environment:

LAMP Environment, Vagrant/Docker, HTML, CSS, JavaScript, JQuery, Twitter Bootstrap, PhpStrom, GIT.

Client: Cisco Systems

February 16 – September 16

Employer: Propelsys LLC

Role: Engineer – Software

Project Title: LabTools

URL: <https://labtools.cisco.com> (private link)

Description:

Develop and maintain web tools and automation for many diverse lab environments, including the labs supported by PDS Lab Services, enabling lab admin groups across all of Cisco to work more effectively.

Responsibilities:

- Evaluating existing Lab tools from across the company
- Developing new Lab Tools for Lab Tools Suite
- Supporting existing Lab Tools Suite
- Developing enhancements for existing Lab Tools Suite
- Used LAMP (Linux, Apache, MySQL and PHP) architecture to develop the tools.
- Setup Dev, Stg and Prod environment with custom compiled PHP and MySQL on Linux Environment.
- Installed SSL Certificates in Linux servers.
- Coordinate and trouble-shoot daily operation of the tools.
- Perform backups, upgrades, and enhancements to the tool.
- Worked on SQL queries, Triggers, Joins, Views, and Constraints etc.
- Designed and developed database with normalization techniques using MySQL.
- Used CURL scripts extensively to communicate with different servers.
- Managed the Linux server and configure Cron Jobs.
- Responsible for maintenance of database on server, Backup and Restore of database in MySQL.
- Managed code in different Linux servers and deployed the code in stg and prod servers using custom scripts.
- Used GIT for Code Management

Environment:

LAMP Environment, HTML, CSS, JavaScript, JQuery, Twitter Bootstrap, AngularJs, PhpStrom, GIT.

Client: AJ Madison

Nov 14 - April 15

Employer: Gyan Web Solutions Pvt. Ltd, India

Role: Sr.PHP Developer

Project Title: WebSpider

Description:

ajmadison.com is an e-commerce site which sells all kinds of appliances. In order to keep the prices competitive with other sites we developed a WebCrawler which checks the prices for a given product(SKU) in different sites and display them at one place.
